An Autonomous Institute

**Curriculum Structure
and
Evaluation Scheme
for
B. Tech.
in
Electronics and Telecommunication
Engineering
with Honor and
Multidisciplinary Minor**

(To be implemented for 2025-2029 Batch)

Dr. D. J. Pawar
Head of Department
HOD

DEPT. OF ELECTRONICS & TELECOMMUNICATION ENGINEERING
SHRI BALASAHEB MANE SHIKSHAN PRASARAK MANDAL'S
ASHOKRAO MANE GROUP OF INSTITUTIONS

Dr. (Mrs) S. S. Patil
Dean Academics

Dr. (Mrs) S. R. Chougule
Dr. Mrs. S. R. Chougule
DIRECTOR

Shri Balasaheb Mane Shikshan Prasarak Mandal's
Ashokrao Mane Group Of Institutions
Vathar Tarf Vadgaon, Tal. Hatkanangale
Dist. Kolhapur, Maharashtra - 416112

Shri Balasaheb Mane Shikshan Prasarak Mandal's,

ASHOKRAO MANE GROUP OF INSTITUTIONS

NH – 4, Vathar Tarf Vadgaon, Tal: -Hatkanangale, Dist: - Kolhapur-416112

An Autonomous Institute

ABBREVIATIONS

- **L:** Lecture
- **T:** Tutorial
- **P:** Practical
- **ISE1-** In Semester Evaluation 1
- **ISE2-** In Semester Evaluation 2
- **MSE:** Mid Semester Exam
- **ESE:** End Semester Exam
- **BSC** -Basic Science Courses
- **ESC:** Engineering Science Courses
- **AEC:** Ability Enhancement Courses
- **IKS:** Indian Knowledge System
- **VSEC:** Vocational and skill Enhancement Course
- **PCC:** Program Core Course
- **PEC:** Program Elective Course
- **CC:** Co-curricular Courses

MULTIDISCIPLINARY MINOR (MDM) BASKET

Important Note:

1. Students should select **any one basket** for the award of Minor Degree of their interest from the table below.
2. The student must complete **all five courses under the selected MDM Basket** to qualify for the Minor.
3. The credits earned under the Multidisciplinary Minor shall form part of the total **172 Credits** required for award of the degree.

| MDM Basket Name | Sr. No. | Course Code | Course Name | Semester | Offered by the Department |
|--------------------------|---------|-------------|-----------------------------------------------|----------|---------------------------------------------------------------------------------------------------------|
| Data Analyst | 1 | 25AM304A | Data Structure | III | Artificial Intelligence & Machine Learning (To all UG Programs except UG AIML, AIDS, CSE, E&C Engg.) |
| | 2 | 25AM404A | R-programming | IV | |
| | 3 | 25AM505A | DBMS | V | |
| | 4 | 25AM605A | Big Data Technologies | VI | |
| | 5 | 25AM705A | Introduction to Machine Learning | VII | |
| Prompt Engineering | 1 | 25AM304B | R-programming | III | Artificial Intelligence & Machine Learning (To all UG Programs except UG AIML, AIDS, CSE, E&C Engg.) |
| | 2 | 25AM404B | Introduction to AI and ML | IV | |
| | 3 | 25AM505B | IOT | V | |
| | 4 | 25AM605B | Introduction to Blockchain Technology | VI | |
| | 5 | 25AM705B | Prompt Engineering | VII | |
| Intelligent Data Systems | 1 | 25AD304A | Computer Organization Architecture | III | Artificial Intelligence & Data Science (To all UG Programs except UG AIDS, AIML CSE, E&C Engg.) |
| | 2 | 25AD404A | R-programming | IV | |
| | 3 | 25AD505A | Data Manipulation, Analysis and Visualization | V | |
| | 4 | 25AD605A | DBMS | VI | |
| | 5 | 25AD705A | Big Data Technologies | VII | |
| Cognitive Computing | 1 | 25AD304B | Computer Organization Architecture | III | Artificial Intelligence & Data Science |
| | 2 | 25AD404B | Introduction to Data | IV | |

OPEN ELECTIVE COURSES

(Students have to select any one Open Elective course, for each applicable semester, of their interest (other than open electives offered by his/her Department) from the table below)

Open Elective – I

| Sr. No. | Course Code | Course Name | Offered by Department |
|---------|-------------|-------------------------------|-------------------------------------------------------------------------------------------|
| 1 | 25AM405A | E Commerce | Artificial Intelligence & Machine Learning & Artificial Intelligence & Data Science |
| 2 | 25CE405B | Environmental Science | Civil Engineering |
| 3 | 25CS405C | Human Computer Interaction | Computer Science & Engineering |
| 4 | 25EE405D | Electrical Safety & Standards | Electrical Engineering |
| 5 | 25EC405E | Sensor Technology | Electronics & Computer Engineering & Electronics & Telecommunication |
| 6 | 25ME405F | Project Management | Mechanical Engineering |

Open Elective – II

| Sr. No. | Course Code | Course Name | Offered by Department |
|---------|-------------|-------------------------------|-------------------------------------------------------------------------------------------|
| 1 | 25AM506A | Design Thinking | Artificial Intelligence & Machine Learning & Artificial Intelligence & Data Science |
| 2 | 25CE506B | Disaster Management | Civil Engineering |
| 3 | 25CS506C | Cyber Security | Computer Science & Engineering |
| 4 | 25EE506D | Energy Audit | Electrical Engineering |
| 5 | 25EC506E | Drone Technology | Electronics & Computer Engineering & Electronics & Telecommunication |
| 6 | 25ME506F | Startup and Business Strategy | Mechanical Engineering |

PROGRAM ELECTIVE CORE COURSES

(Students have to select any one Program Elective Core course out of 03, for each applicable semester, of their interest, offered by the Department from the table below)

Program Elective Core - I

| Sr. No. | Course Code | Domain | Course Name | Semester |
|---------|-------------|---------------------|----------------------------------------|----------|
| 1 | 25ET504A | Embedded System | Computer Architecture and Organization | V |
| 2 | 25ET504B | Communication Engg. | Information Theory and Coding | |
| 3 | 25ET504C | VLSI Design | RTL Basics | |

Program Elective - II

| Sr. No. | Course Code | Domain | Course Name | Semester |
|---------|-------------|---------------------|---------------------------------|----------|
| 1 | 25ET603A | Embedded System | Embedded Processor | VI |
| 2 | 25ET603B | Communication Engg. | Optical Fiber Communication | |
| 3 | 25ET603C | VLSI Design | CMOS VLSI Design | |
| 4 | 25ET609A | Embedded System | Embedded Processor Lab | VI |
| 5 | 25ET609B | Communication Engg. | Optical Fiber Communication Lab | |
| 6 | 25ET609C | VLSI Design | CMOS VLSI Design Lab | |

Program Elective - III

| Sr. No. | Course Code | Domain | Course Name | Semester |
|---------|-------------|---------------------|------------------------|----------|
| 1 | 25ET604A | Embedded System | Embedded System Design | VI |
| 2 | 25ET604B | Communication Engg. | Wireless Communication | |

| | | | | | | ESE | 50 | | |
| Total | | 6 | 0 | 4 | 8 | | 300 | | |
| | | | | Total Contact Hours- 10 | Total Credits- 8 | | | | |

General Instructions:

➤ **For Theory Courses:**

1. Two components of **In Semester Evaluation (ISE)**, one **Mid Semester Examination (MSE)** & one **End Semester Examination (ESE)**.
2. **ISE-I & ISE-II** is based on online objective type examination / Assignments / Mini Projects / Quiz & Technical Puzzles / Surprise Test / Oral / Presentation / Seminar / Innovative approach to problem solving.
3. **MSE** will be conducted with **30%** weightage based on first **50%** syllabus.
4. **ESE** will be conducted on 100% course content having 30% weightage on first 50% course content & 70% weightage for remaining 50% syllabus.

➤ **For Laboratory Courses:**

1. **ISE** assessment contains weightage like 20% for practical performances, 40% for Journal & 40% for Group Presentation / Oral / Quiz.
2. **ESE** assessment is based on oral examination / practical oral examination.

B.Tech. (Hons) in Computer Vision

Department: Electronics and Telecommunication Engineering

| Course Code | Name of the Course | Credit |
|-------------|------------------------------------------------------|-----------|
| 25ET3H | Data Structures and Algorithms | 3 |
| 25ET4H | Computer Graphics | 3 |
| 25ET5H | Fundamentals of Image Processing and Computer Vision | 3 |
| 25ET6H | Machine Learning | 3 |
| 25ET7H | Deep Learning for Computer Vision | 3 |
| 25ET8H | Virtual Reality | 3 |
| | Total | 18 |

Guidelines for Honor Certification Courses

1. Students are required to complete six courses (each carrying 3 credits) through an online platform to earn a total of 18 credits under the Honor Certification scheme.
2. All six courses must be completed starting from the Second Year First Semester (Semester III) to the Final Year Second Semester (Semester VIII).
3. The student has to obtain all 18 credits by the last semester of the program.
4. While selecting the course platform, first preference must be given to SWAYAM/NPTEL.
5. Registration on platforms such as Coursera or UdeMy is permitted only under the following conditions:
 - a. The SWAYAM/NPTEL course schedule does not align with the academic calendar.
 - b. The subsequent course in the learning sequence is not available on SWAYAM/NPTEL.
 - c. Any other unavoidable circumstances arise.
 - d. About 80% of the contents of the course should match with the SWAYAM/NPTEL courses.
6. Course selection must strictly adhere to the recommendations of the Chairman of Board of Studies (BOS).
7. Credits for the respective Honor courses will be awarded under the following conditions:
 - a. For NPTEL courses, students must complete all assignments on time, pass the examination, and obtain the certificate.

NH - 4, Vathar Tarf Vadgaon, Tal: -Hatkanangale, Dist: - Kolhapur-416112

Website: www.amgoi.edu.in

- An Autonomous Institute -

- b. For Coursera or Udemy courses, students must obtain the course certificate and appear for the Online examination which will be conducted under the supervision of the Institute by Examination Cell
8. While selecting an online course, the following criteria must be ensured:
- The course should be of an advanced level, not basic or introductory.
 - The course content must not overlap with subjects already included in the regular curriculum or listed under elective courses.
 - The duration of each course must be:
 - Minimum 8/12 weeks for SWAYAM/NPTEL courses
 - At least 30+ hours for Coursera/Udemy courses

|------------------------------------------------|-------|-----|--------|---------|
| Course Name: Analog Electronics Circuit Design | L | T | P | Credits |
| Course Code:25ET301 | 3 | -- | -- | 3 |
| Evaluation Scheme: | ISE-I | MSE | ISE-II | ESE |
| Marks: | 10 | 30 | 10 | 50 |

Pre-Requisite: Basic Electrical Engineering, Semiconductor Physics.

| Course Objective: The course aims to: | |
|---------------------------------------|------------------------------------------------------------------------------------------------------------------------|
| 1 | Understand the construction, working principles, and characteristics of BJTs, FETs and MOSFETs. |
| 2 | Analyze biasing techniques, amplifier configurations, frequency response, and stability aspects of electronic devices. |
| 3 | Apply concepts of power amplifiers, feedback amplifiers, oscillators, multivibrators, and wave shaping circuits. |
| 4 | Design and analyze linear power supply circuits and IC voltage regulators for practical applications. |

| Course Outcomes: At the end of the course, students will be able to: | |
|----------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------|
| CO1 | Explain the construction, working principles, characteristics, and operating regions of BJT, JFET, MOSFET, and CMOS devices. |
| CO2 | Analyze BJT, FET, and MOSFET amplifier configurations using small-signal models. |
| CO3 | Apply principles of oscillators, multivibrators, switching circuits, and wave shaping circuits |
| CO4 | Design basic linear power supply circuits and voltage regulators using discrete components and IC regulators (78XX, 79XX, LM317). |

| | | | | |
|------------------------------------|--------------|------------|---------------|----------------|
| Course Name: Digital Design | L | T | P | Credits |
| Course Code: 25ET302 | 3 | -- | -- | 3 |
| Evaluation Scheme: | ISE-I | MSE | ISE-II | ESE |
| Marks: | 10 | 30 | 10 | 50 |

Pre-Requisite: Basic knowledge of number systems, Binary Arithmetic, Boolean Algebra, Basic Electronics.

| Course Objective: The course aims to: | |
|----------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | An understanding of logic design principles for simplifying and implementing digital circuits using universal gates and minimization techniques. |
| 2 | Knowledge of analysis and design methods for combinational logic circuits including arithmetic units, encoders, decoders, multiplexers, and display interfaces. |
| 3 | Understanding of the operation and design of sequential logic circuits including flip-flops, registers, and counters. |
| 4 | Study the characteristics, operation, and interfacing of different digital logic families such as TTL and CMOS. |
| 5 | Design and implement finite state machines and understand programmable logic devices, semiconductor memories, and basic VHDL concepts. |

| Course Outcomes: At the end of the course, students will be able to: | |
|-----------------------------------------------------------------------------|---------------------------------------------------------------------------------------|
| CO | Course Outcomes |
| CO1 | Design Boolean functions using Reduction Techniques as well as using universal gates. |
| CO2 | Design combinational and sequential digital logic circuits. |
| CO3 | Describe the classification, characteristics, and operation of digital logic families |
| CO4 | Implement digital applications with appropriate state machines, PLA, PAL or PLDs |

| Course Name: Applied Mathematics | L | T | P | Credits |
| Course Code: 25ETC303 | 3 | 1 | -- | 4 |
| Evaluation Scheme: | ISE-I | MSE | ISE-II | ESE |
| Marks: | 10 | 30 | 10 | 50 |

Pre-Requisite: Knowledge of differential and integral calculus, and elementary differential equations.

| Course Objectives: | |
|---------------------------|----------------------------------------------------------------------------------------|
| 1 | To introduce the concept of Laplace Transform and the conditions for its existence. |
| 2 | To familiarize students with the concept and importance of inverse Laplace transforms. |
| 3 | To introduce the concept of integral transforms and Fourier integral theorem. |
| 4 | To study different methods of measuring correlation. |
| 5 | To understand the properties and significance of regression coefficients. |

| Course Outcomes: At the end of the course, students will be able to | |
|----------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| CO1 | Apply Laplace Transform techniques to evaluate transforms of elementary functions and solve integrals and differential equations in engineering problems. |
| CO2 | Apply inverse Laplace transform to solve linear and simultaneous differential equations with constant coefficients. |
| CO3 | Analyze functions using Fourier integrals and Fourier transforms for applications in signal processing and heat conduction problems. |
| CO4 | Evaluate the degree and nature of correlation between variables using Karl Pearson's correlation coefficient and Spearman's rank correlation to interpret real-world data. |

| Evaluation Scheme: | ISE 1 | MSE | ISE 2 | ESE |
| Marks: | 25 | - | 25 | - |

Pre-Requisite: Awareness of social, community or environmental issues relevant to engineering solutions.

Course Objectives: The course aims:

1. To develop awareness of social responsibility and community challenges.
2. To enable students to identify real-life problems and design practical solutions.
3. To promote teamwork, leadership, and communication skills.
4. To enhance ethical conduct and professional documentation practices.

Course Outcomes: At the end of the course, students will be able to:

| CO | Course Outcomes |
|-----|-----------------------------------------------------------------------------|
| CO1 | Identify community needs through interaction and field surveys. |
| CO2 | Analyze societal problems and design feasible intervention strategies. |
| CO3 | Implement community-based projects using participatory methods. |
| CO4 | Evaluate project outcomes and prepare professional technical documentation. |

CO-PO & PSO Mapping:

Course Overview: The Mini Project-I course is designed to instill social responsibility among students and strengthen the connection between academic institutions and local communities. The project encourages students to apply their academic knowledge to solve real-life societal challenges and contribute towards sustainable development.

- The guiding motto of this course is: **“Campus to Community”**
- Students are expected to identify socially relevant issues under the guidance of faculty mentors and propose or implement practical solutions. These projects promote collaboration, empathy, leadership skills, and civic responsibility, enabling students to gain real-world experience while benefiting society.
- A group of students (max. 4 and min. 2) could be assigned with a project guide.

The topics for the course may cover the following diverse sectors (but not limited to):

- **Health:** Free health check-up camps, mental health awareness programs.
- **Livelihood:** Skill development workshops, micro-entrepreneurship support.
- **Education:** Digital literacy programs, mobile libraries, career guidance camps.
- **Environment:** Rainwater harvesting awareness, solar lighting initiatives.
- **Cultural Heritage:** Documentation of local history, cultural exchange programs.

Through such initiatives, communities become active partners in development, creating a more inclusive and resilient society.

| Sr. No. | Guidelines |
|---------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | <p>Project Overview: Students will engage with a local community or a specific group within the community, such as schools, women’s groups, farmers, etc. to identify challenges and collaboratively develop solutions. This hands-on project allows students to apply their knowledge and skills while fostering social responsibility.</p> <p>Key Components of the Project: 1. Community Selection & Understanding:</p> <ul style="list-style-type: none"> • Community Identification: Choose a community in need of support, whether it’s based on location (urban, rural) or a demographic group (youth, elderly, marginalized populations). • Problem Identification: Engage with community members to identify pressing issues or challenges, such as education, health, environment, or livelihoods. • Cultural Sensitivity: Understand the cultural, social, and economic background of the community before engaging. |

Shri Balasaheb Mane Shikshan Prasarak Mandal's,
ASHOKRAO MANE GROUP OF INSTITUTIONS

NH - 4, Vathar Tarf Vadgaon, Tal: -Hatkanangale, Dist: - Kolhapur-416112

Website: www.amgoi.edu.in

An Autonomous Institute

2. Engagement Approach:

• Participatory Method:

Involve the community at every stage—from identifying problems to developing and implementing solutions.

• Partnership with Local Leaders:

Collaborate with community leaders, NGOs, or local government representatives to ensure the project's effectiveness.

• Capacity Building:

Focus on empowering community members with knowledge and skills that promote self-reliance.

3. Community Engagement Methodology:

A. Pre-Engagement Research:

Conduct preliminary research on the community to understand its demographics, socio-economic conditions and existing services or infrastructure.

Review similar case studies or projects to gain insights into best practices.

B. Initial Field Visits:

Arrange field visits to meet with key stakeholders and community members. Hold informal meetings to build rapport and trust.

C. Needs Assessment:

Use surveys, interviews or focus group discussions to gather information about the community's needs.

Assess both short-term and long-term needs related to areas such as education, healthcare, sanitation, livelihoods and environment.

D. Project Design:

Based on the findings from the needs assessment, propose actionable solutions.

Ensure that the proposed interventions are feasible, sustainable and culturally appropriate.

Examples of interventions could include awareness campaigns, skill development workshops, environmental conservation activities or infrastructure improvements.

4. Implementation Plan:

A. Action Plan:

• **Timeline:** Create a clear timeline for implementing the project, with specific milestones.

• **Roles & Responsibilities:** Assign specific tasks to team members and involve community members in the implementation process.

Shri Balasaheb Mane Shikshan Prasarak Mandal's,
ASHOKRAO MANE GROUP OF INSTITUTIONS

NH - 4, Vathar Tarf Vadgaon, Tal: -Hatkanangale, Dist: - Kolhapur-416112

Website: www.amgoi.edu.in

An Autonomous Institute

- **Resource Management:** Identify the resources (financial, material, human) needed to implement the project and create a budget.

B. Pilot Project (if applicable):

- Consider implementing a pilot phase to test the intervention on a smaller scale and make necessary adjustments before full-scale implementation.

C. Community Participation:

- Encourage community ownership by involving them in the execution phase (e.g., labor, materials, decision-making).
- Provide opportunities for community members to gain skills during the implementation, such as through training sessions or workshops.

5. Monitoring & Evaluation:

A. Monitoring Progress:

- Regularly assess the progress of the project against the action plan.
- Identify any challenges or delays and address them promptly in collaboration with the community.

B. Evaluation:

- Measure the impact of the project by comparing pre-project and post-project conditions.
- Use both qualitative and quantitative methods to evaluate success (e.g., improvements in literacy rates, health outcomes, or income levels).

D. Community Feedback:

- Gather feedback from the community on the effectiveness of the intervention.
- Hold feedback sessions with community leaders and participants to assess whether the project has met their expectations and addressed their needs.

6. Reporting & Documentation:

B. Final Report:

- Prepare a comprehensive report documenting the entire project process, from the initial engagement to implementation and evaluation.
- Include sections on:
 - Introduction and community background
 - Needs assessment findings
 - Project design and implementation strategy
 - Challenges and lessons learned
 - Outcomes and impact analysis
 - Recommendations for future engagement

C. Visual Documentation:

- Include photographs, videos or other visual media to document the

Shri Balasaheb Mane Shikshan Prasarak Mandal's,

Website: www.amgoi.edu.in

An Autonomous Institute

process and outcomes.

- Create info graphics or presentations that highlight key results and impact.

7. Reflection and Learning:

B. Team Reflection:

- Hold a reflection session with your project team to discuss the experiences, challenges, and personal growth resulting from the project.
- Identify what worked well and what could be improved for future community engagement efforts.

C. Community Reflection:

- Engage the community in a reflective discussion about their experience with the project and the changes they have observed or experienced.

8. Ethical Considerations:

A. Informed Consent:

- Ensure that community members give informed consent before participating in the project, especially in data collection activities (e.g., interviews, surveys).
- Maintain transparency about the project's goals and the expected outcomes.

C. Respect for Cultural Norms:

- Respect the community's cultural practices, beliefs, and social norms throughout the project.
- Avoid imposing external solutions that may not align with the community's values.

D. Confidentiality:

- Ensure confidentiality and privacy when dealing with sensitive information, especially personal or demographic data.

9. Submission Guidelines:

A. Final Report:

- Submit a well-organized report that includes all phases of the project.

B. Presentation:

- Prepare a final presentation summarizing the project, including key results, challenges and recommendations.
- Use visual aids, such as photos, videos or maps to illustrate the community engagement process and outcomes.

10. Evaluation Criteria:

| Title of the Course Name: Analog Electronics Circuit Design Laboratory | L | T | P | Credits |
| Course Code: 25ET308 | -- | -- | 02 | 1 |
| Evaluation Scheme: | ISE | - | - | ESE |
| Marks: | 50 | | | 50 |

Pre-Requisite: Basic Electronics

| | |
|----------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------|
| Course Objective: The course aims to: | |
| 1 | Understand the operation and characteristics of BJT, JFET/MOSFET amplifiers |
| 2 | Design and test amplifier and oscillator circuits using active devices.. |
| 3 | Analyze frequency response, efficiency, and performance parameters of electronic circuits using simulation and hardware implementation.. |
| 4 | Design and implement regulated power supply circuits using diode and IC regulators. |

| | |
|-----------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------|
| Course Outcomes: At the end of the course, students will be able to: | |
| CO | Course Outcomes |
| CO1 | Design and test BJT and MOSFET amplifiers |
| CO2 | Analyze frequency response and performance of RC coupled and power amplifiers using hardware and simulation tools. |
| CO3 | Design and verify the oscillators |
| CO4 | Design and implement wave shaping circuits, regulated DC power supplies and IC regulators |

| Course Content | | |
|----------------|----------------------------------------------------------------------------------------|-----|
| Experiment No. | Experiment Title and Contents | Hrs |
| 1 | Design and test single-stage BJT CE amplifier. | 2 |
| 2 | Plot and analyze frequency response of RC Coupled CE amplifier using simulation tools. | 2 |
| 3 | Design and test JFET/MOSFET common-source amplifier. | 2 |
| 4 | Design and test Class-A power amplifier. | 2 |
| 5 | Simulate Class-B/AB power amplifier. | 2 |
| 6 | Design and verify Colpitts oscillator. | 2 |
| 7 | Design and verify Hartley oscillator. | 2 |
| 8 | Design and test diode clipper circuits. | 2 |
| 9 | Design and test diode clamper circuits. | 2 |
| 10 | Design and test Zener as Voltage regulator | 2 |
| 11 | Design and test three terminal IC voltage Regulator-78XX and 79XX | 2 |
| 12 | Design of DC Power Supply | 2 |

Note: *Minimum 10 experiments to be performed.

| | | | | |

Pre-Requisite: Basic Electronics Components, Basic Logic Gates, Fundamentals of Basic Electronics.

| | |
|----------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------|
| Course Objective: The course aims to: | |
| 1 | Understand and verify the operation of basic and universal logic gates through practical implementation and truth table validation. |
| 2 | Design and implement combinational logic circuits such as adders, subtractors, code converters, multiplexers, demultiplexers, and comparators. |
| 3 | Design and analyze digital circuits using universal gates (NAND and NOR) and evaluate their functional equivalence to basic logic gates. |
| 4 | Design, implement, and verify sequential circuits including flip-flops and shift registers using hardware and simulation tools. |

| | |
|-----------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------|
| Course Outcomes: At the end of the course, students will be able to: | |
| CO | Course Outcomes |
| CO1 | Verify basic and universal logic gate circuits, and their truth tables. |
| CO2 | Implement combinational arithmetic circuits |
| CO3 | Design combinational logic circuits such as Multiplexers, Demultiplexers, and Comparators for digital system applications. |
| CO4 | Perform sequential circuits including Flip Flop and Shift Registers. |

| Course Content | | |
|----------------|-------------------------------------------------------------------------------------------------------------------|-----|
| Experiment No. | Experiment Title and Contents | Hrs |
| 1 | To verify the truth tables of basic logic gates (AND, OR, NOT, NAND, NOR, XOR) | 2 |
| 2 | To design and implement the basic logic gates (AND, OR, NOT) using only NAND gates and verify their truth tables. | 2 |
| 3 | To design and implement the basic logic gates (AND, OR, NOT) using only NOR gates and verify their truth tables. | 2 |
| 4 | To design and implement Half Adder and Full Adder circuits and verify their outputs using truth tables. | 2 |
| 5 | To design and implement Half Subtractor and Full Subtractor circuits and verify their outputs using truth tables. | 2 |
| 6 | To design and implement a Binary to Gray code converter and verify the output for all input combinations. | 2 |
| 7 | To design and implement a Gray to Binary code converter. | 2 |
| 8 | To implement a 4:1 Multiplexer using logic gates and verify its operation using a truth table. | 2 |
| 9 | To design and implement a 1:4 Demultiplexer and verify its functionality. | 2 |
| 10 | To design and implement a 2-bit digital comparator and verify the comparison outputs. | 2 |
| 11 | To verify the truth table and operation of a J-K Flip Flop. | 2 |
| 12 | To design and simulate 4-bit right shift and left shift register using D-flip flop | 2 |

Note: *Minimum 10 experiments to be performed.

Course Content

| Unit No. | Contents | Hrs |
|----------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| 1 | Introduction to Signals Representation of Standard signals, Classification of signals: Continuous-time and discrete-time signals, Periodic Signals and non-periodic, Power and energy signals, Causal signals and Non-causal signals. Operations on signals: Time shifting, Time reversal, Time scaling, Amplitude scaling, Signal addition, Subtraction, Signal multiplication. | 8 |
| 2 | Introduction to System Classification of Systems: Continuous-time and Discrete-time systems, Linear and Non-Linear systems, Time variant and Time-invariant systems, Stable and Unstable systems, Causal systems, and non-causal systems. | 7 |
| 3 | Linear time invariant Systems The representation of signals in term of impulses, convolution sum, convolution integral, computation of convolution integral using graphical method, Computation of convolution sum. Properties of convolution, properties of the system based on impulse response, step response in terms of impulse response. | 7 |
| 4 | Sampling Representation of continuous time signals by it's samples, The sampling theorem, Reconstruction of signals from its samples using interpolation, The effect of under sampling, aliasing, Discrete time processing of continuous time signals, Sampling in the frequency domain. | 7 |

| | | |
|---|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---|
| 5 | Fourier Transform Complex exponential form of Fourier series, Fourier Transform (FT) representation of aperiodic continuous time (CT) signals, Dirichlet condition for existence of Fourier transform, evaluation of magnitude and phase response, FT of standard CT signals, Properties and their significance, Application of Fourier transform | 7 |
| 6 | Laplace and Z-Transform Definition of Laplace Transform (LT), Limitations of Fourier transform and need of Laplace transform, ROC and its properties, properties of Laplace transform, Inverse Laplace transform based on partial fraction expansion, Application of Laplace transforms to the LTI system analysis. Introduction to Z-transform, and its properties, Inverse- Z-transform, different methods of inverse Z-transform, Z transform for discrete time system LTI analysis. | 6 |

| Title of the Course Name: Microcontroller | L | T | P | Credits |
| Course Code: 25ET402 | 3 | -- | -- | 3 |
| Evaluation Scheme: | ISE-I | MSE | ISE-II | ESE |
| Marks: | 10 | 30 | 10 | 50 |

Pre-Requisite: Digital Electronics

| | |
|----------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------|
| Course Objective: The course aims to: | |
| 1 | Understand the fundamentals of microprocessors and microcontrollers with emphasis on 8085 and 8051 architectures. |
| 2 | Analyze instruction sets, addressing modes, timing diagrams, and interrupt mechanisms of 8085 and 8051 |
| 3 | Develop assembly language programs and embedded C programs for 8051-based applications. |
| 4 | Design and implement basic interfacing circuits using 8051 with peripherals such as displays, sensors, motors, and serial communication modules. |

Course Outcomes: At the end of the course, students will be able to:

| CO | Course Outcomes |
|-----------|----------------------------------------------------------------------------------------------------------------------------|
| CO1 | Explain the architecture, pin configuration, instruction cycles, and interrupt structure of the 8085 microprocessor. |
| CO2 | Describe the architecture, memory organization, instruction set, and interrupt system of the 8051 microcontroller. |
| CO3 | Write and debug assembly language and Embedded C programs for data transfer, arithmetic, timing, and serial communication. |
| CO4 | Interface 8051 with external devices such as LEDs, LCDs, keypads, ADC/DAC, and motors for real-time embedded applications. |

|---------------------------------------------------------------------|--------------|------------|---------------|----------------|
| Course Name: Quantitative Aptitude and Logical Reasoning - I | L | T | P | Credits |
| Course Code: 25ET407 | 1 | -- | -- | 1 |
| Evaluation Scheme: | ISE-I | MSE | ISE-II | ESE |
| Marks: | -- | -- | -- | -- |

Course Description:

This course builds essential skills in arithmetic, percentages, ratios, profit & loss, and interest, alongside problem-solving methods like LCM-HCF, time-rate-work, and SI-CI. It also covers logical reasoning topics—blood relations, coding-decoding, direction sense, and series—to sharpen analytical thinking. Learners gain speed, accuracy, and adaptability for exams, recruitment, and entrepreneurial decisions.

Pre-Requisite: Basic concepts of Basic Mathematical Knowledge, Language Proficiency and Analytical Readiness.

| Course Objective: The course aims to: | |
|----------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | Develop the ability to recall and explain fundamental principles, enabling learners to build a strong conceptual foundation for quantitative and reasoning skills. |
| 2 | Gain proficiency in applying methods and techniques to solve structured problems and practical scenarios with accuracy and confidence. |
| 3 | Cultivate analytical thinking by examining relationships, patterns, and logical structures, thereby enhancing decision-making and problem validation skills. |
| 4 | Integrate diverse approaches and create effective strategies, supporting innovation and adaptability in academic, professional, and real-world contexts. |

Course Outcomes: At the end of the course, students will be able to:

| CO | Course Outcomes |
|-----|---------------------------------------------------------------------------------------------------------------------------------|
| CO1 | Recall key concepts of Mathematics for placements and business applications. |
| CO2 | Apply quantitative methods to solve structured numerical problems in exams and entrepreneurial contexts. |
| CO3 | Analyze logical reasoning problems to identify patterns and enhance reasoning skills. |
| CO4 | Evaluate alternative solution approaches for efficiency and create integrated solutions supporting innovation and adaptability. |

| Course Name: Constitution of India | L | T | P | Credits |
| Course Code: 25ET408 | 2 | - | - | 2 |
| Evaluation Scheme: | ISE-I | MSE | ISE-II | ESE |
| Marks: | 25 | -- | 25 | -- |

Course Description:

This course provides an overview of the Indian Constitution, focusing on its historical background, structure, and key features. It covers fundamental rights, directive principles, duties, and the functioning of the Union, State, and local governments. The course also explains constitutional bodies, amendment processes, emergency provisions, and Centre–State relations. It promotes active citizenship and highlights the role of engineers in democratic governance and nation-building..

Pre-Requisite: Basic knowledge of Indian History

| Course Objective: The course aims to: | |
|----------------------------------------------|-------------------------------------------------------------------------------------------------------|
| 1 | Introduction to the historical and legal foundations of the Indian Constitution and its key features. |
| 2 | Understanding of the structure and functioning of Union, State, and local governments. |
| 3 | Familiarization with fundamental rights, duties, directive principles, and constitutional bodies. |
| 4 | Promotion of responsible citizenship and active participation in a democratic society. |

| Course Outcomes: At the end of the course, students will be able to: | |
|-----------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| CO1 | Understand and explain the historical and legal foundations of the Indian Constitution along with its key features. |
| CO2 | Describe the structure, functions, and governance mechanisms of Union, State, and local governments, including the roles of constitutional bodies, Fundamental Rights, Duties, and Directive Principles. |
| CO3 | Demonstrate an understanding of responsible citizenship and actively participate in a democratic society through constitutional values and practices. |

| Course Code: 25ET404A | 3 | -- | -- | 3 |
| Evaluation Scheme: | ISE-I | MSE | ISE-II | ESE |
| Marks: | 10 | 30 | 10 | 50 |

Pre-Requisite: Basic Programming Knowledge, Basic Electronics, Computer Networks Basics

| Course Objective: The course aims to: | |
|---------------------------------------|--------------------------------------------------------------------|
| 1 | 7. Understand communication technologies used in IoT. |
| 2 | 8. Learn networking protocols and standards for IoT systems. |
| 3 | 9. Study cloud, data analytics, and security technologies for IoT. |
| 4 | 10. Analyze emerging IoT technologies and trends. |

| Course Outcomes: At the end of the course, students will be able to: | |
|----------------------------------------------------------------------|---------------------------------------------------------------------------------------------|
| CO | Course Outcomes |
| CO1 | Explain various wireless communication technologies used in IoT systems. |
| CO2 | Analyze IoT networking protocols and their role in device-to-device and cloud communication |
| CO3 | Illustrate cloud-computing models and edge/fog paradigms for IoT applications. |
| CO4 | Apply data analytics and basic AI techniques for IoT data processing and prediction. |
| CO5 | Evaluate security requirements and emerging technologies in IoT ecosystems |

Name of the MDM Basket- Embedded Systems

| | | | | |
|------------------------------------|--------------|------------|---------------|----------------|
| Course Name: Digital Design | L | T | P | Credits |
| Course Code: 25ET304B | 3 | -- | -- | 3 |
| Evaluation Scheme: | ISE-I | MSE | ISE-II | ESE |
| Marks: | 10 | 30 | 10 | 50 |

Pre-Requisite: Basic knowledge of number systems, Binary Arithmetic, Boolean Algebra, Basic Electronics.

| Course Objective: The course aims to: | |
|----------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | An understanding of logic design principles for simplifying and implementing digital circuits using universal gates and minimization techniques. |
| 2 | Knowledge of analysis and design methods for combinational logic circuits including arithmetic units, encoders, decoders, multiplexers, and display interfaces. |
| 3 | Understanding of the operation and design of sequential logic circuits including flip-flops, registers, and counters. |
| 4 | Study the characteristics, operation, and interfacing of different digital logic families such as TTL and CMOS. |
| 5 | Design and implement finite state machines and understand programmable logic devices, semiconductor memories, and basic VHDL concepts. |

| Course Outcomes: At the end of the course, students will be able to: | |
|-----------------------------------------------------------------------------|---------------------------------------------------------------------------------------|
| CO | Course Outcomes |
| CO1 | Design Boolean functions using Reduction Techniques as well as using universal gates. |
| CO2 | Design combinational and sequential digital logic circuits. |
| CO3 | Describe the classification, characteristics, and operation of digital logic families |
| CO4 | Implement digital applications with appropriate state machines, PLA, PAL or PLDs |

| | | | | |
|-------------------------------------------------------|-------|-----|--------|---------|
| Course Name: Microcontroller & Interfacing Techniques | L | T | P | Credits |
| Course Code: 25ET404B | 3 | -- | -- | 3 |
| Evaluation Scheme: | ISE-I | MSE | ISE-II | ESE |
| Marks: | 10 | 30 | 10 | 50 |

Pre-Requisite: Digital Electronics

| Course Objective: The course aims to: | |
|---------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | Understand the fundamentals of microprocessors and microcontrollers with emphasis on 8085 and 8051 architectures. |
| 2 | Analyze instruction sets, addressing modes, timing diagrams, and interrupt mechanisms of 8085 and 8051 |
| 3 | Develop assembly language programs and embedded C programs for 8051-based applications. |
| 4 | Design and implement basic interfacing circuits using 8051 with peripherals such as displays, sensors, motors, and serial communication modules. |

Course Outcomes: At the end of the course, students will be able to:

| CO | Course Outcomes |
|-----|----------------------------------------------------------------------------------------------------------------------------|
| CO1 | Explain the architecture, pin configuration, instruction cycles, and interrupt structure of the 8085 microprocessor. |
| CO2 | Describe the architecture, memory organization, instruction set, and interrupt system of the 8051 microcontroller. |
| CO3 | Write and debug assembly language and Embedded C programs for data transfer, arithmetic, timing, and serial communication. |
| CO4 | Interface 8051 with external devices such as LEDs, LCDs, keypads, ADC/DAC, and motors for real-time embedded applications. |

**CO-PO & PSO Mapping:**

| CO | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PSO1 | PSO2 | PSO3 |

Open Elective-I

| | | | | |
|---------------------------------------|--------------|------------|---------------|----------------|
| Course Name: Sensor Technology | L | T | P | Credits |
| Course Code: 25ET405D | 2 | -- | -- | 2 |
| Evaluation Scheme: | ISE-I | MSE | ISE-II | ESE |
| Marks: | 10 | 30 | 10 | 50 |

Pre-Requisite: Basic Electronics, Basic Physics

| Course Objective: The course aims to: | |
|----------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | To introduce the fundamental concepts, classification, and working principles of sensors and transducers, including mechanical and physical sensors. |
| 2 | To explain thermal, optical, magnetic, chemical, and biosensing techniques and their operating principles. |
| 3 | To provide knowledge of signal conditioning, sensor characteristics, and interfacing techniques used in measurement systems. |
| 4 | To familiarize students with smart sensors and their applications in modern engineering systems. |

| Course Outcomes: At the end of the course, students will be able to: | |
|-----------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------|
| CO | Course Outcomes |
| CO1 | Explain the fundamentals, classification, characteristics, and working principles of sensors, including mechanical and physical sensors. |
| CO2 | Interpret and analyze the operating principles of thermal, optical, and magnetic sensors for measurement applications. |
| CO3 | Apply chemical and biosensors along with signal conditioning and sensor interfacing techniques in environmental and biomedical systems. |
| CO4 | Evaluate smart sensors and their applications in modern engineering systems. |
